Recommended accessories

GN container Stainless steel full

Enameled GN container

Directions

The first stage

 \diamond Wash and remove the internal organs of the saury, do not damage the gallbladder with the knife, so as to prevent the fish from becoming bitter, cut into pieces and absorb the water \diamond Spray oil on the surface of cut saury, put it on a non-stick flat baking tray and grill it at high temperature

 \diamond Fry the saury until the skin is crispy and then stew. Frying and roasting can remove the fishy smell and increase the aroma

second stage

♦ Made with a standard cooking pot, the sauce completely covers the saury, at least 1 cm higher than the fish body ♦ Please cover the lid or baking tray for steaming and roasting to avoid scorching the surface by hot air \diamond Keep stuffy for 30 minutes after coming out of the oven, then soak for 24 hours after rapid cooling
